## AFFIRMATION OF ORIGINALITY — US GOVERNMENT EMPLOYEES

As the primary author, I certify that the manuscript titled

---

is original, that all statements asserted as facts are based on careful investigation and research for accuracy, that the manuscript does not, in whole or part, infringe any copyright or violate any right or privacy or other personal or property right whatsoever, *that it has not been previously published in total, and that it is not being submitted or considered for publication in total or in part elsewhere prior to publication in BioProcess International.*

I certify that all authors are or were officers or employees of the US Government when the submitted work was prepared and that the submitted work was prepared as part of my/our official duties and is a “work of the US Government.” As such, it is therefore in the public domain in the United States and not eligible for US copyright.

Reciprocal links to BPI’s Website are appreciated. NIH-funded authors who need to comply with the NIH Public Access policy or other similar mandates have permission to upload the final, published version of the article to the NIH Manuscript Submission system for immediate public access in PubMed Central or other funders’ repositories. Please contact the editors if you need to receive your text in a different format/file type conducive to that upload.
